Ali Rayyan

Full-Stack Software Engineer | React, Next.js, TypeScript, Python

Pakistan | +92 3147862856 | alirayyancyber@gmail.com | github.com/aliray-yan | linkedin.com/in/ali-rayyan-cybersecurity | aliray-yan.github.io/Portfolio

Software engineering student (BS, expected 2027) and recent Frontend AI Engineering Intern who ships full-stack products end to end: Next.js and React front ends, FastAPI, ASP.NET Core and Node.js back ends, PostgreSQL, authentication and automated tests.

Technical Skills

Languages: TypeScript, JavaScript, Python, C#, Kotlin, HTML, CSS

Frontend: React 19, Next.js 16, Vite, Tailwind CSS, TanStack Query, Zustand, WAI-ARIA accessibility, responsive design

Backend and APIs: Node.js, Express, FastAPI, ASP.NET Core Web API, REST, WebSockets, JWT, Auth.js, role-based access control, Zod

Data, AI and Testing: PostgreSQL, Prisma, Entity Framework Core, SQLAlchemy, Docker, Git, Vercel AI SDK, RAG, scikit-learn; Vitest, React Testing Library, Playwright, pytest

Professional Experience

Frontend AI Engineering Intern | FlyRank | Remote | Jun 2026 - Sep 2026

- Shipped a full-stack portfolio CMS (Next.js 16, React 19, Prisma, Neon Postgres) with a CRUD dashboard, Cloudinary uploads and generated SEO metadata.
- Integrated a streaming AI chat assistant (Vercel AI SDK, OpenRouter) with 3 server-side tools, retry logic and layered error handling, plus mobile Safari fixes.
- Implemented role-based authentication (Auth.js, JWT sessions) with Zod validation and parameterized Prisma queries to close off XSS and SQL injection risk.
- Hand-built WAI-ARIA Modal, Tabs and Disclosure components from the W3C spec, validated with Vitest, React Testing Library and axe-core.

SOC Analyst Apprentice | Empirical Training | Greater London, UK | Jun 2025 - Aug 2025

- Built an n8n pipeline that summarizes CISA and NVD feeds with GPT-4 (70% less manual monitoring) and automated phishing triage (50% less manual triage time).

Projects

SecureOps - SOC Analyst Workbench | Evidence-Portfolio/secureops-main

- Built an alert triage and case management app (React, FastAPI) with JWT auth, RBAC, live WebSocket alerts, a playbook builder and seven threat-intel API integrations.

.NET Mastery | Evidence-Portfolio/dotnet-mastery-zero-to-advanced-main

- Built a learning platform (React, ASP.NET Core, EF Core, PostgreSQL) with JWT auth, admin CRUD, an authenticated C# code runner, 26 levels and 600+ quiz questions.

RAG AI Mastery | Evidence-Portfolio/rag-ai-mastery-main

- Built a RAG playground (React, Node.js, Prisma) with document upload, configurable chunking, retrieval scores and citations; supports OpenAI-compatible and Ollama.

IHADRS Windows EDR | Evidence-Portfolio/EDR-Ihadrs-master

- Designed an event-driven detection pipeline (rule engine, behavioral detector, Isolation Forest) with a token-authenticated REST API and 394 automated tests.

Astro Health | Evidence-Portfolio/astro-health

- Built a NASA Space Apps Challenge 2026 dashboard (Next.js, FastAPI) that simulates astronaut vitals, flags anomalies with Isolation Forest and explains them with AI.

Also built: IHADRS Mobile (Kotlin, Jetpack Compose, Room, Hilt) and Java Mastery (offline Android learning app)

Education and Certifications

Bachelor of Science in Software Engineering | Government College University Faisalabad (GCUF), Pakistan | 2023 - 2027 (expected)

Relevant coursework: Data Structures, Web Development

Certifications: IBM AI Developer Professional Certificate (Coursera, 2025); Supervised Machine Learning: Regression and Classification (DeepLearning.AI, Stanford, 2025)

Forage Job Simulations (virtual): Walmart Advanced Software Engineering; Commonwealth Bank (.NET, React/Redux, tests); Hewlett Packard Enterprise (RESTful service, unit tests); Y Combinator; Blackbird; PwC Technology Consulting
