ALI RAYYAN

CYBERSECURITY ANALYST | SOC OPERATIONS | DETECTION & INCIDENT RESPONSE

Pakistan | +92 314 7862856 | alirayyancyber@gmail.com
github.com/aliray-yan | linkedin.com/in/ali-rayyan-cybersecurity | aliray-yan.github.io/Portfolio

PROFESSIONAL SUMMARY

Software engineering student with cybersecurity internship and SOC apprenticeship experience across SIEM monitoring, threat research, detection engineering, malware analysis, and digital forensics. Built Wazuh and FortiGate labs, investigated security events, and automated phishing-triage and threat-intelligence workflows.

TECHNICAL SKILLS

Security operations Wazuh, Microsoft Sentinel, Elastic SIEM, Sumo Logic, KQL, log correlation, alert triage, incident response, MITRE ATT&CK, NIST SP 800-61

Network & vulnerability security FortiGate, Wireshark, Nmap, Nessus, Suricata, CVSS, Active Directory, VMware; AWS CloudTrail, GuardDuty, and IAM investigation labs

Forensics & automation Autopsy, FTK Imager, Volatility 3, EvtxECmd, CyberChef, ExifTool, Binwalk, Hybrid Analysis, Tines, n8n, Sublime Security, basic Python scripting

EXPERIENCE

SOC Analyst Intern — Blue Team | Cyberster

Remote · Mar–May 2026

- Centralized FortiGate traffic logs in Wazuh, resolving a UDP 514 conflict by using port 5140 and validating log visibility across the virtual lab.
- Analyzed njRAT and Win32.Infostealer.Dexter with static tools and sandbox reports; extracted 14 indicators of compromise and authored 4 Suricata signatures and 4 Wazuh rules.
- Investigated the M57.biz training case using disk, event-log, and memory evidence; reconstructed an 11-event timeline and produced a NIST-aligned insider-threat simulation report.

Cybersecurity Threat Research Intern | Tech Hierarchy

Remote · Mar–Apr 2026

- Researched the FBR Tax Fraud Breach, TPS ransomware incident, and MOVEit CVE-2023-34362; assessed confidentiality, integrity, availability, and business impact.
- Mapped adversary techniques to MITRE ATT&CK and documented security gaps and mitigation recommendations in a comparative incident report.

Cybersecurity Analyst | Talosec

Remote internship · Dec 2025–Feb 2026

- Built a VMware SOC lab integrating FortiGate, Windows Server Active Directory, and Wazuh; segmented WAN, LAN, and Server/SOC networks and configured syslog forwarding.
- Created reconnaissance and brute-force detection rules, active responses, and dashboards across 4 lab endpoints; investigated Ubuntu logs and honeypot activity.

SOC Analyst Apprentice | Empirical Training

SOC training and lab program · Jun–Aug 2025

- Investigated Microsoft Sentinel and Sumo Logic lab alerts, correlated events with KQL, and used Nessus, Nmap, and CVSS to prioritize vulnerability findings.
- Integrated Elastic SIEM, Tines, and Sublime Security for phishing triage; deployed Suricata, honeypots, and Canary Tokens to validate detection behavior in simulations.

SELECTED CYBERSECURITY PROJECTS

IHADRS Windows EDR & SecureOps Integration

Independent project · github.com/aliray-yan/EDR-Ihadrs

- Developed a Python endpoint-detection project with MITRE ATT&CK-mapped rules, behavioral correlation, a PyQt6 interface, and response actions; implemented queued alert export to SecureOps.

Phishing Triage & Threat Intelligence Automation

SOC lab projects · github.com/aliray-yan/Evidence-Portfolio

- Configured a Tines phishing-analysis story to parse .eml files and extract metadata for Sublime Security triage. Built an n8n workflow that summarizes CVE RSS entries with GPT for analyst review.

Cloud SIEM Investigation

Sumo Logic training case · github.com/aliray-yan/Evidence-Portfolio

- Correlated Proofpoint TAP, proxy, CloudTrail, and GuardDuty events to reconstruct a simulated phishing-to-AWS credential-exfiltration sequence and map attack stages to MITRE ATT&CK.

CYBERSECURITY JOB SIMULATIONS

Forage virtual job simulations — self-paced practical exercises; separate from employment.

PwC US | Cyber Security Consulting · Oct 2026

- Risk assessment, SDLC walkthrough, IT general-controls design and effectiveness testing, and a controls-testing summary presentation.

Deloitte Australia | Cyber · Oct 2026

- Analyzed web-activity logs and suspicious user behavior in a simulated data-breach investigation.

Mastercard | Cybersecurity · Apr 2025

- Designed a phishing-email simulation, interpreted campaign results, and prepared security-awareness recommendations.

Tata | Cybersecurity Analyst · May 2025

- Assessed IAM strategy, designed identity and access-management solutions, and prepared an integration plan.

ANZ | Cyber Security Management · May 2025

- Completed social-engineering and digital investigations, including phishing-email analysis and a PCAP report.

Telstra | Cybersecurity · Apr 2025

- Analyzed a simulated malware attack, completed mitigation exercises, and documented an incident postmortem.

AIG | Shields Up Cybersecurity; Datacom | Cybersecurity · Apr 2025

- AIG: zero-day response and ransomware-recovery exercises. Datacom: APT-breach analysis and cybersecurity risk assessment.

EDUCATION & CERTIFICATIONS

BS Software Engineering Government College University, Faisalabad, Pakistan · 2023–2027 (expected)
IBM Cybersecurity Analyst Professional Certificate Coursera · Sep 2025
Fortinet FCF courses Introduction to the Threat Landscape 2.0 (Apr 2025); Getting Started in Cybersecurity 3.0 (May 2025)
