ALI RAYYAN

SOFTWARE ENGINEER | FRONTEND, FULL STACK & AI APPLICATIONS

Pakistan | +92 314 7862856 | alirayyancyber@gmail.com
github.com/aliray-yan | linkedin.com/in/ali-rayyan-cybersecurity | aliray-yan.github.io/Portfolio

PROFESSIONAL SUMMARY

Software engineering student with frontend AI engineering internship experience building full-stack web applications, accessible React interfaces, and streaming AI integrations. Works with TypeScript, Next.js, Python, PostgreSQL, and automated testing; security experience informs authentication and input-validation decisions.

TECHNICAL SKILLS

Languages & frontend TypeScript, JavaScript, HTML, CSS, React, Next.js, Tailwind CSS; Python, C#, Java, and SQL through projects and training
Backend & data Node.js, FastAPI, Flask, ASP.NET Core, Spring Boot, REST APIs, Prisma, PostgreSQL, SQLite, Auth.js, JWT, Zod
Testing & tools Git, GitHub, Vitest, React Testing Library, axe-core, Playwright, Docker, GitHub Copilot; Vercel AI SDK, OpenRouter, n8n

EXPERIENCE

Frontend AI Engineering Intern | FlyRank

Remote · Jun–Sep 2026

- Built a full-stack cybersecurity portfolio CMS with Next.js 16, React 19, TypeScript, Tailwind CSS, Prisma, and Neon PostgreSQL; implemented CRUD management for projects, posts, certifications, and skills.
- Integrated Cloudinary uploads and generated SEO metadata, a sitemap, and JSON-LD for portfolio content.
- Developed a streaming AI assistant with Vercel AI SDK and OpenRouter, including 3 server-side tools for project search, skills visualization, and introduction-email drafting; added retry and stream-error handling.
- Implemented Auth.js authentication, JWT sessions, admin/user roles, Zod input validation, and parameterized Prisma queries.
- Built Modal, Tabs, and Disclosure components following WAI-ARIA patterns; tested keyboard interaction, focus management, and accessibility with Vitest, React Testing Library, and axe-core.

SELECTED ENGINEERING PROJECTS

SecureOps SOC Analyst Workbench

React, TypeScript, FastAPI, SQLAlchemy · github.com/aliray-yan/secureops

- Built a full-stack workbench for alert triage, threat-intelligence enrichment, case management, and reporting; implemented JWT authentication, role-based access, and audit logging.
- Connected endpoint-alert ingestion with retry-safe identifiers and WebSocket updates; added enrichment-provider adapters, caching, and JSON, CSV, HTML, and PDF exports.

ENGINEERING PROJECTS (CONTINUED)

LegacyX Strangler Fig Modernization

ASP.NET Core, Spring Boot, FastAPI, PostgreSQL, Kafka · github.com/aliray-yan/Legacyx-Strangler-Fit

- Built a demonstration platform for extracting services from a legacy monolith; implemented per-domain gateway routing, cutover and rollback, and event-driven retail workflows.
- Added tenant-aware administration and separate aviation services; documented remaining aviation migration and security-scope limitations.

IHADRS Windows Endpoint Detection

Python, PyQt6, REST API · github.com/aliray-yan/EDR-Ihadrs

- Implemented a rule and behavioral detection pipeline, desktop and web interfaces, and queued SecureOps alert export with stable identifiers and retry backoff.

ADDITIONAL PROJECTS

TemplateForge | TypeScript | github.com/aliray-yan/templateforge

- Developed a website-template builder with reusable sections and an export-oriented workflow; source and implementation details are in the repository.

Java Mastery | Kotlin, Jetpack Compose | github.com/aliray-yan/JavaLearningApp

- Built an offline Android learning application with lessons, quizzes, coding exercises, flashcards, and local progress tracking.

SOFTWARE ENGINEERING JOB SIMULATIONS

Forage virtual job simulations — self-paced practical exercises; separate from employment.

Blackbird | Software Engineering · Oct 2026

- GitHub collaboration with Propeller; code-building and verification exercises with Harrison.ai; product/market-fit exercise.

Walmart USA | Advanced Software Engineering · Oct 2026

- Data structures, software architecture, relational database design, and data-munging exercises.

Hewlett Packard Enterprise | Software Engineering · Oct 2026

- Proposed a RESTful web service, built a basic service with data upload, and created unit tests.

Commonwealth Bank | Software Engineering · Oct 2026

- Modified a .NET backend and React/Redux frontend, updated client requests, added tests, and prepared a pull request.

Y Combinator | Working as a Software Engineer at a Startup · Oct 2026

- Made frontend updates from feedback, changed backend features, and analyzed release data.

PwC US | Technology Consulting · Oct 2026

- Created an interview guide, translated requirements into a user story, built a delivery roadmap, and wrote an executive summary.

EDUCATION & CERTIFICATIONS

BS Software Engineering Government College University, Faisalabad, Pakistan · 2023–2027 (expected)
IBM AI Developer Professional Certificate Coursera · Dec 2025
IBM Cybersecurity Analyst Professional Certificate Coursera · Sep 2025
